DEPARTMENTS

1. Orthopaedic & Trauma

The department of orthopaedic with international facilities and skilled experts' guidance assure optimal medical, surgical and therapeutic care to patients with all kinds of orthopaedic conditions.

The department is well-equipped with state-of-the-art operation theatres and fully equipped ultramodern critical care beds to help our patients have a quick recovery. Patients suffering from major traumatic injuries are given immediate care at the 24X7 traumatic care divisions which is well-resourced with advanced facilities and staff.

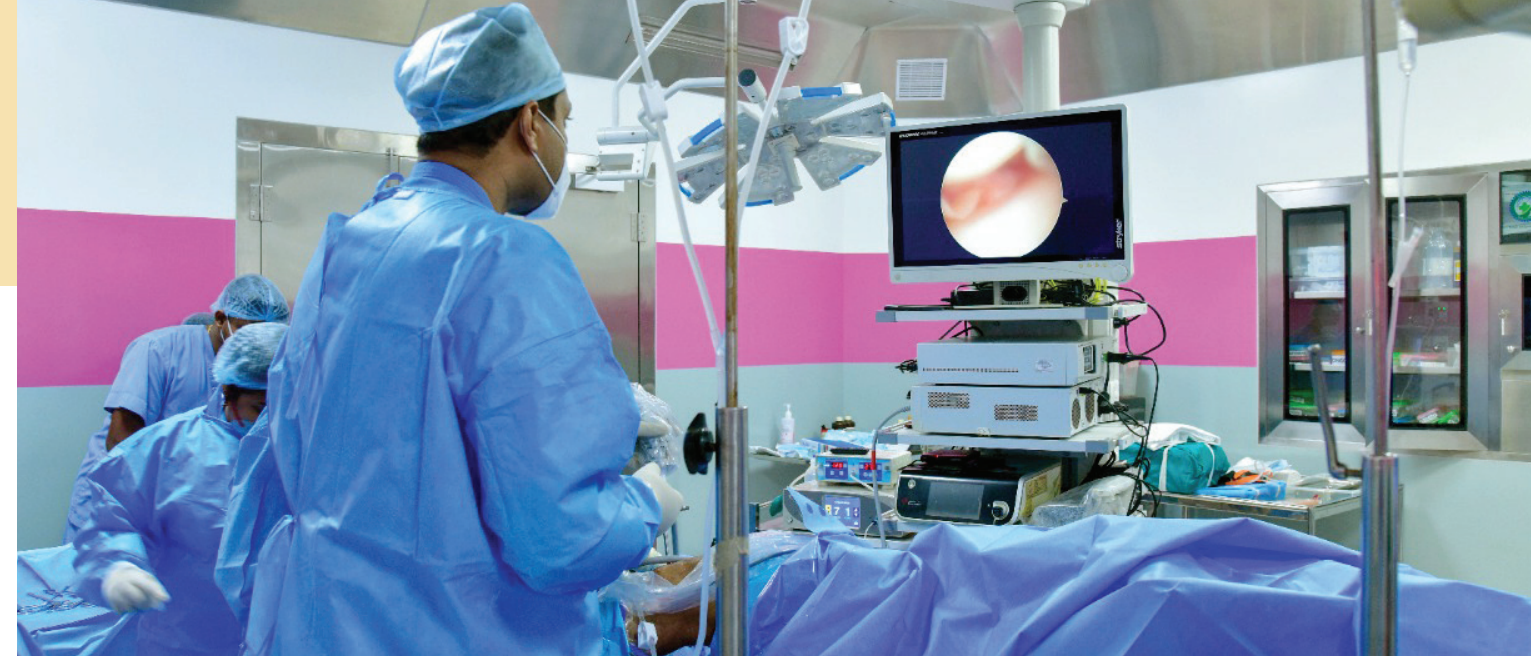

2. Arthroscopy & Sports Injuries

We understand the need for quick recovery and pain management in sports injuries and our sports medicine team works with surgeons to put our patient's health back on track. Using the latest minimally invasive surgical techniques and the latest imaging techniques, our specially trained doctors offer consultation, treatment and surgery for sports injuries without restricting the activity of the patient and reducing recovery time. The world-class arthroscopy theatre at craft regularly conducts knee, Elbow and shoulder arthroscopy, revision and replacement surgeries.

Through our fully equipped sports rehabilitation and physiotherapy unit. We provide a line-up of services ranging from sports injury management to fitness testing and exercise prescription for health and fitness, and sports performance enhancement.

BEFORE

AFTER

4. Spine Care Unit

We have a fully equipped spine care unit

Services & facilities

- Minimally invasive spine surgery
- Dedicated operation theatre for spine surgeries
- Spine deformity correction (scoliosis, kyphosis, etc.)
- Spine trauma
- Disc prolapse
- Spine tumours

5. Physiotherapy

The Physiotherapy Department at AR Super Speciality Hospital functions systematically, offering comprehensive treatment facilities for patients. The department is an important aspect of AR Super Speciality Hospital, helping patients gain back their independence after a disabling disease or a traumatic injury. Specialists in this area work with patients to help minimise the physical and cognitive effects of disability so that patients may reach their fullest potential.

Depending upon an individual's medical and emotional condition and personal goals, patients may experience a number of benefits as a result of physical therapy and rehabilitative care, including:

- The ability to return to work
- The ability to develop the skills necessary for independent living. Without such care, many of these patients would otherwise require long-term home care.
- Shortened or less frequent hospitalisation

Services & facilities

Problems Mainly Dealt With
